EDUCATION

Linköping University

Graduate courses in Computer Vision and Signal Analysis

Sep 2023 - Jun 2025

Linköping, Sweden

Kyoto University

Exchange studies - Faculty of Engineering

Apr 2022 - Aug 2023

Kyoto, Japan

Linköping University

Master of Science in Applied Physics and Electrical Engineering - International, Japanese

Aug 2019 - Jun 2025

Linköping, Sweden

PROFESSIONAL EXPERIENCE

Vision Systems Engineer

Rolling Optics

Jul 2025 – Ongoing

Sweden

- Industrial computer vision anomaly detection system development.
- Designing algorithms for generating unique optical effects.
- Managing in-house QA observability systems and on-prem servers .
- Relevant skills include OpenCV, YOLO, C++, Docker, React, Python, CI/CD, MS Azure.

AI & Engineering Consultant

ReXcel Technologies

Oct 2023 – Ongoing

- Provides consultancy and development services in software engineering and computer vision, including AI-driven solutions for customers in Sweden and Japan.
- Implemented and deployed AI-powered web applications.
- Relevant skills include React, Typescript, Django, Python, CI/CD, Devops, LLM harness development, Agentic integrations.

Thesis Work Intern

Qualcomm

Jan 2025 – Jun 2025

Linköping, Sweden

- Researched and developed real-time low-light vehicle detection methods using deep learning algorithms.
- Relevant skills include PyTorch, YOLO, CNN, Deep learning, academic writing, Jupyter Notebook.

Technical Assistant

Kyoto University

Mar 2023 – Aug 2023

Kyoto, Japan

- Led the development of a web application to host a user-driven competition, designing a scalable full-stack architecture, with back-end logic to ensure fair competition.
- Relevant skills include Django, React, Amazon Web Services (AWS).

Computer Vision Engineer

Rutilea

Jul 2022 – Feb 2023

Japan

- Developed an OpenCV-based algorithm for operational monitoring and evaluation.
- Created an API interaction framework in collaboration with an overseas team.
- Skills include CV, proficiency in Japanese.

SKILLS

Languages: Swedish (Native), English (Fluent), Japanese (Advanced, JLPT N1)

Programming Languages: Python, Java, TypeScript, JavaScript, C#, C++

Web Development: HTML/CSS, React, Django, GraphQL

Systems and Databases: Linux, Postgres, AWS, Hetzner

Machine Learning and Data Science: PyTorch, Computer Vision, Deep Learning, CI/CD, Prompt Engineering, OpenCV

Software and Tools: Word, Excel, PowerPoint
